

we can  
**prevent**  
traffic deaths

why not **diabetes?**

If we can use public policy to change attitudes and behavior around using seat belts, we can use it to limit the societal costs of type 2 diabetes. Right now, there are nearly 26 million Americans with diabetes and another 79 million at risk of developing the disease. Implementing proven prevention methods could reduce the rate of diabetes and its complications, which would save thousands of lives and billions of dollars annually. Diabetes prevention is a smart investment. Learn more at [LetsPreventDiabetes.org](http://LetsPreventDiabetes.org).

Fund the National Diabetes Prevention Program.

The Diabetes Advocacy Alliance™ (DAA) is a coalition of patient, professional and trade associations, nonprofit organizations, and corporations united in their effort to elevate diabetes higher on the national agenda. [www.DiabetesAdvocacyAlliance.org](http://www.DiabetesAdvocacyAlliance.org)
